

We struggled through the break up of the bell system. Now that everything is finally working again and we are saving money I hear that you want to change the law. Please don't upset the operation of the whole phone systsem again. Please continue to allow for open competition. Small businesses along with my friends and I are having trouble making ends meet. We need whatever savings we can get to keep our heads above water. If costs continue to spiral and paychecks continue to stay static or lower then you will have even more unemployment and small businesses failing. Leave this market alone and find ways that the government can lower their own expenses thereby lowering our taxes. Thank you.
